

The Raymond Roster

A PAPER DEVOTED TO THE INTERESTS OF RAYMOND

VOL. 8

RAYMOND, ALBERTA, FRIDAY, JULY 8, 1910

NO. 108

News of the Week

Miss Mary Hyde was at Cardston on Friday last.

Mr. and Mrs. D. A. Bennett were at Cardston for the 1st.

A large number of Raymondsites spent the 2nd at Magrath.

Mr. and Mrs. Geo. Kirkham were at Magrath on Dominion Day.

Mr. J. T. Smellie left on Tuesday morning's train for Rexburg Idaho.

Situation wanted for well educated Youth. Reply to Rustler Office.

Born:—In Raymond on Monday July 4 to the wife of J. F. Salmon a daughter.

There will be no paper next week as the Roster Staff are taking their summer holiday.

"Ye Editor" was at Cardston playing with the Cardston Military Band on the 1st and 2nd.

Misses Ann Anderson, Olga Anderson and Dora Stevens were at Taber for Dominion Day.

The Raymond Baseball team were defeated at Warner, Stirling and Lethbridge, on Dominion Day.

Have you been to the Mercantile's Sale today?

Dr. J. S. Way of Toronto Ont. has arrived to assist Dr. Riven in the practice here. Dr. Way is an honor graduate of Toronto University and has spent one year as chief surgeon in the Western Hospital Toronto. So he comes well qualified to practise his profession here.

Drs. Riven and Way have opened a well equipped office in the Security Block Room 9 where they can be consulted. Dr. Way will answer all night calls from this office. A telephone will be installed for them as soon as possible.

We welcome Dr. Way, to our midst and bespeak for him a liberal patronage.

Raymond will celebrate Utah Pioneer Day on Monday July 25th 1910. A good lively time is anticipated the committee has a good program of sports to interest all from the small boy to the oldest man in town.

The neighboring towns have been invited to participate in the celebration and a large crowd is expected.

The committee have under consideration the cutting down of the track to half mile and putting same in shape for July, 25 1910.

If everybody will do a little toward the celebration a good time will result.

Come put your shoulder to the wheel and off we go for a humber of a time July 25th.

Mr. Urel O'Brien was in Lethbridge last week.

Mr. William Saunders is visiting in town this week.

The Raymond Mercantile's Big Sale starts today.

Clearance Sale of Millinery at the High Art Millinery Parlor.

Messrs Geo Laycock, Wm. Fisher Chas. Fawns, J. Lee, Bert Kinsey, and others spent Dominion Day at Cardston.

Mr. Wesley McMullin and Miss Luella McMullin, and Rheda Newell, returned from Magrath on Monday morning.

Chicago, July 1.—Today was the hottest of the season so far, the thermometer registering 93 degrees at 1 p. m. One death and 12 prosecutions due directly to the heat, were reported to the police.

Remember the Raymond Mercantile's Big sale starts today.

FOR SALE:—Piano, 3 piece Parlor Suite, Rug, Carpet, music Cabinet, Leather Chair, Arm Chair Hat Rack, Bed room Suite, Range, Washing Machine, Boiler, Fruit, Jars, Picture Frames, Glass, Knobs, Hinges, Blinds, Carpet, Sweeper, Curtain Stretcher, Chicken Coop, Wire, Water barrel, 1 Tub, Wheel Barrow, Lounge.

T. A. Amos.

Ottawa, June 20.—William J. White, inspector of Canadian immigration agencies in the United States stated today that 150,000 Americans will cross over to Western Canada this season, according to a reliable estimate. Mr. White has just returned from an inspection trip. "At all meetings of bankers out there now," he said, "the prevailing complaint is about the great amount of money going to Canada to buy land."

The Irrigation Convention

Irrigation is the landmaiden of agriculture, and the history of the first is coeval with that of the second. In the cradle of the race the success of crops was absolutely dependent upon water supply, and throughout Asia, Minor, India, Egypt and China there are still in existence remains of Irrigation works which by their size and workmanship bear mute testimony to the importance of irrigation to the long forgotten builders. Canals, in length, breadth and depth, larger by far than any yet dreamed of by modern engineers; storage basins which rival in size some of our great lakes, stone aqueducts which would bear the weight of a couple of modern railway trains running on a double tracked road existed in all these countries. Even the great dam at Assouad had a rival in that which occupied virtually the same position prehistoric times. In more recent times the art spread to Italy, Spain and North Africa or rather from North Africa to Spain and hence to Italy. It was the Spanish Monks, those devoted adherents of the Cross, who accompanied the Spanish armies of conquest on even their most remote expeditions, who first introduced the art of irrigation into the New World. From the small works which they constructed wherever they erected an altar, the work has spread all over the arid and semi-arid districts of our two Americas. Even yet the work is still in its infancy, and local conditions have so far been the only ones considered. The result has been the wasteful distribution from the more costly controlled sources, and the ignoring of those larger sources which could be utilized for the irrigation of huge stretches of country. During the past few years, however, governments have become interested in what was hitherto propounded for the individual, capital has begun to recognize that money invested in irrigation projects will give good returns.

The increase of interest in the activity in irrigation has given rise to many vexed questions, and it is only by the interchange of views between those who are interested in the subject or have studied these questions from the practical, the engineering or the legal standpoint that any final system of control, administration and distribution of the available water supply can be arranged.

This is the object which the promoters of the Western Canada Irrigation Association had in view when they met four years ago for the purpose of organizing, and this is the object of the meeting which will be held in Kamloops on August 3rd, 4th and 5th of this year.

It is hoped that the attendance of all parts of the province will be sufficiently interested in the subject of irrigation to have delegates present, that in the Dry Belt

all those who must prefer to take a more intimate interest will turn up whether delegates or not. The programme, which it is hoped will be carried out by the 11th papers by Mr. Neely, chief representative of the United States, Clifford Sifton, M. P., an enthusiastic advocate of irrigation; H. B. Bennett, of Calgary, and Charles Wilson, K. C., both of whom are experts on the legal questions connected with irrigation, and A. E. Ashcroft of Vernon and A. E. Meighen, of Kamloops, on the practical side as concerned with company projects. Other recognized experts on different branches of the subject will also be asked to prepare papers for submission to the convention, and the discussion on all these papers cannot but result in benefit to the cause.

Resolution may be brought before the convention, and it is requested that proposed resolutions should be mailed to J. T. Hall, Secretary Western Canada Irrigation Convention, Brandon Manitoba before July 20th.

The people of Kamloops are particularly interested in the subject of irrigation, and will spare no effort to make the convention a success as far as lies in their power.

Annual Celebration At Edmonton.

This year on August 23, 24, 25 and 26, The Edmonton Exhibition Association, Ltd., will hold its annual Stock Show and Race Meet at which over \$30,000 will be distributed in Prizes, Purses and Attractions.

The exhibit will be held in the new grounds acquired through the City of Edmonton, consisting 147 acres of land, about 80 of which are being devoted entirely to Exhibition purposes. On these grounds modern stock buildings have been erected, a grand stand which will accommodate 5000 people, besides Poultry and Dog, Dairy and Horticultural Buildings, Race Stables, etc., and an up-to-date half mile standard race track, the total expenditure on grounds and buildings exceeding \$175,000. Another \$200,000 will be expended on Exhibition buildings before 1912, when the Provincial Exhibition complete in all departments will be held in Edmonton. One feature of the 1912 Exhibition will be the raising of the first Edmonton Futurity for 3 year old Trotters and Pacers for which a stake of \$5,000 has been guaranteed. A similar futurity has been guaranteed to be run in 1913, guaranteed value of which is \$15,000. Entries for both of these stakes close a Sept. 1st. The Edmonton Derby for 3 year old running horses, value \$1,000 will also be run in 1913, entries for which close on Nov. 1st. About sixty entries have been already received for the Futurity for hares here and by Sept. 1st it is expected that this number will be increased to one hundred.

Besides encouraging the breeding of racing stock, The Edmonton Association have also taken steps to promote breeding for harness racing and by forming the Alberta Provincial Horse, Cattle, Sheep and Swine Breeders' Associations having their headquarters and registered office in Edmonton.

JOHNSON WINS

Champion Could Not Regain Form

RENO, July 8.—(A. P.) Johnson is still the champion of the world in the 125 lb. weight class. He won the fight with the negro blocker the other night. The fight was one-sided from the start. The negro blocked the champion's blows at every stage of the game and punished him severely in the last five rounds of the fighting.

TOOK COUNT TWICE

At the beginning of the thirteenth round the experts at the ring-side passed out the verdict that if Jeffries would simply stay and not fight he might stay the limit. As they came up for the fifteenth round Johnson went to his man savagely. He sent Jeff to the floor the first time with a rain of fists and rights to the jaw and Jeff took the count of eight twice.

THE FIGHTERS FELL OUT side the lower rope on the platform. As soon as he got up the second time he staggered for a foot or so. Johnson sprang at him like a tiger and with right and left swings to the jaw, sent him through the lower rope on the east side of the ring, where he lay until counted he was counted out.

As Jeffries was helped to his corner he said: "I am not a good fighter any longer. I could not come back, boys—I could not come back. Ask Johnson if he will give me his gloves."

As Jeffries hung through the ropes after the last knock down a hundred of his friends rushed forward. "Please don't let the old man be knocked out. Stop!" They called.

The timekeeper's hand moved up and down the towel was brought out the ring from the east corner. Whether counted out or not, it will probably be recorded as a knockout.

At the end of the fifteenth round Referee Tex Richards raised the black arm of Johnson and the great crowd filed out again and silent. Jeffries was dragged to his corner bleeding from nose and mouth and a doctor came on the scene. He had a black closed eye and swollen features and he held his head in his hands, dazed and dazed.

Johnson walked out of the ring without a mark on his body except a slight cut on his lip. He was the respondent of a wound received in training.

NOT CHAMPIONSHIP FIGHT

Ring experts agree that it was not a championship fight. Jeffries was a champion in the 125 lb. weight class, but Johnson was not. Johnson was a champion in the 125 lb. weight class, but Johnson was not.

STOMACH MISERY

DANISHED BY "FRUIT-A-LIVES"

What Mrs. Novena Hilde said to me at the concert this evening.

Mrs. Witham: "No, my dear, do tell me all about it."

Mrs. Aristocrat: "Well, she informed me that she had decided to have a non de plume in her hat."

My head is ached incessantly.

I was told to try "Fruit-A-lives" and sent for six boxes. Now I am entirely well, can eat any ordinary food and never have a headache."

ALICE HERRBY.

No. 4 box, 6 for \$3.50, or trial box, 25c. At all dealers or from Fruit-A-lives Limited, Ottawa.

MRS. ARISTOCRAT: "Did you hear what Mrs. Novena Hilde said to me at the concert this evening?"

Mrs. Witham: "No, my dear, do tell me all about it."

Mrs. Aristocrat: "Well, she informed me that she had decided to have a non de plume in her hat."

A New Horse or Kendall's Spavin Cure?

Warner, Ont.

Feb. 11th.

"I had a horse that had a navies for a long time and I had used every kind of medicine and horse a neighbor told me to use Kendall's Spavin Cure."

M. ROSENTHAL.

Kendall's Spavin Cure is no untold experiment, but the world's standard remedy for all swellings, both horses and lameness in horse and man.

Send the world over for years.

Every farmer, stockman, expressman, heavy transporter and horse owner generally should keep it always on hand.

A bottle for 50c. Ask your dealer for a copy of our book "Kendall's Spavin Cure" or write to Dr. R. J. NEWMAN, Co., 54 Elm Street, Fall River, Mass.

Dr. Martell's Female Pills

SEVENTEEN YEARS THE STANDARD

Prescribed and recommended for women of all ages, a scientifically prepared remedy of proven worth. The result from their use is quick and permanent. For sale at all drug stores.

Dye Your Clothes Sure Way.

Just think of it! With the SAME Dye you can color ANY kind of Cloth Perfectly—no matter what material. Why not dye your Drapery or Bedding?—the same Dye will do it. The Japanese Dyeing Co., Limited, 100 Queen Street East, Toronto.

FASHIONS AND FANCIES

THE fashionable, popular woman of today finds she must keep herself provided with smart evening gowns all the time. Consequently the constantly changing fashions in this style of gown are always eagerly sought after. The woman who can cut the best dinner and ball gowns can always be sure of a desirable clientele. It is not such an easy matter to get

vine of pink roses worked in silk, shaded from palest to deep material. In description this may sound too heavy; in the fact of the material on gray and this is a true shade of the pink of the satin.

Green is a popular color this season, and is to be worn not only in the day time but at evening as well. Nile green, fashionable twenty years ago, is now more popular and is a most effective and becoming color under artificial light. Covered with voile to give the same shade of green as the silver or crystal embroidered tulle, it seems most appropriate for the summer, while when intended for the most elaborate gown it is trimmed with heavy gold, silver or crystal lace. Still embroidery on the satin gown was most fashionable last summer for the many elaborate gowns that were designed for the late summer season, and will now be very smart for several months.

It is a mistake to combine any color with green in the embroidery on the gown, but two three shades of green are much smarter. When the embroidery is on the tulle of transparent material, or in bands of embroidery, color can be introduced, but it is rather a dangerous experiment and not to be rashly recommended.

KILLING THE GERMS IN WATER

THE method for preparing water for drinking purposes by killing the germs instead of attempting to remove them is now advocated by an increasing number of hygienists. Practically this means treatment with ozone or some similar agent instead of using filters. It is stated by The Engineering Magazine that the employment of electrical ozonizers in Europe for the sterilization of drink-water continues steadily to increase. Paris, we are told, has installed apparatus with a capacity of 10,000 gallons a day, and Nice treats 2,000, 000 gallons a day. The latest addition to the list of cities employing this method of water purification is St. Petersburg. In a comprehensive discussion of the place of ozone in sanitation Dr. A. Mohr, writing in the Electrical Engineer, discusses the sterilizing action of this variant form of oxygen with its radioactivity, which is marked. We quote as follows from an abstract of Mohr's article in the magazine it is named above:

"A small domestic apparatus is now on the market, in which the air is sucked through the ozonizer by means of an engine driven on the outlet of the water-pipe, the air thereby serving the double purpose of an air-pump and ozone-mixer. This apparatus will treat 50 gallons of water a day. Using a small apparatus of this description, Dr. Neisser found that, with water at a pressure of 30 pounds per square inch, the number of germs was reduced from 2,000 to 2 per cubic centimeter."

"In the case of the apparatus, the germs are actually killed, whereas in the ordinary mechanical type of filter they are merely held back by the ordinary household. Hence these filters are a positive danger in themselves. Once possessed both taste and smell, and is thus distinct from ordinary filters. However, the danger of water treated with ozone is not at all implied; indeed, the added oxygen serves to give the water a distinctly refreshing taste."

"Besides its use in sterilizing drinking water, ozone is likely to be of great help as a disinfectant in the prevention of epidemic diseases. The pathogenic of disease-producing bacteria appear quite unable to survive the powerful action of ozone, while, according to Dr. Koch's experiments, spores which are highly resistant to formaldehyde are killed in a few minutes' treatment by a 2 per cent. solution of carbonic acid, and are not even injured by a 1 per cent. solution. Sterilizing bacilli will resist a temperature of over 212 deg. F. To quote again:

"Clearly there must be a solid fact on the ground for the flushing and disinfecting of sewers and non-drains, especially in view of the fact that ozone destroys sulphuretted hydrogen, and would probably be far more effective in dealing with the gas from sewer-ventilation pipes than the present method of burning the gas by the use of special gas-lamps."

Air-smokers have already been extensively used for hospital and sick-room disinfecting, but the use of any form of ozonizer sewer work has up to the present not been tried.

Silver Embroidered Gray Voile Gown Over White Satin

satisfactory evening gowns as is generally supposed, for as much depends upon the figure of the wearer. A model that will meet universal approbation and be eagerly chosen by the majority will prove most satisfactory to one out of three purchasers, for color, material and design, each and all, have to be studied by the individual. This is one reason why there are always so many different designs in evening gowns.

The black evening gown has not of late been nearly so popular as a few seasons since. Certainly every well-gowned woman includes at least one smart evening gown in her season's outfit, but no longer is it possible to feel smartly gowned in a black gown for any and every occasion. The black evening gown is now more of the richest quality and must be meticulously trimmed to look as smart as the gown of light color. The crystal, steel, silver, gold and diamant trimmings will transform any black gown, and the embroidered tulle tunics are of immense assistance in this season in giving the desired note of effectiveness.

A revival of a charming fashion of many years ago is seen in the evening gowns that are cut round instead of square and finished with the plain bertha of chiffon or tulle edged with fringe of silver, crystal or gold. A black satin gown in this fashion with a tulle or bertha in black tulle and the bertha edged with silver, bead fringe and diamant where the bertha fastens, is most becoming. The same model, however, carried out in rose pink or a light shade of nautie blue is more effective. This season great attention is paid to the lines as well as the trimming of the waists of evening gowns; there are several attractive styles with the square line, but among the new ones are more with the round off the shoulder cut; the lagoon effect is again given by the surplus folds of chiffon over the shoulders or by the lace that goes over the shoulders and finishes the top of the waist. The fashion still prevails of the dress dropping below the shoulder quite apart from the gown, but the lace that trims the waist shields the arm itself and softens the rather too eccentric effect wonderfully.

Lace is used this season more lavishly than ever and more being brought out from treasure boxes and made use of. Flounces, with bertha to match, trim satin voile de robe gowns of all shades, and the lace is so used that its beauty of design and texture is displayed to the best advantage. Embroidered note and lace that are not to be found in any treasure box, but are of the most recent manufacture, are in great demand for the summer evening gowns, and there are many women who contend that the modern lace can be utilized to far better advantage than can the most valuable old family lace, especially as one of the strongest of unwritten laws, to the effect that real lace must never be cut, except the most extraordinary influence over all women. The embroidered note and lace of the moment are certainly beautiful enough to satisfy the most capricious critic, and it must be conceded that it is far simpler to deal with the new than with the old.

Silver and gold laces are extremely fashionable and are well adapted for the trimming of all evening gowns. There are many different designs and textures, some light and fine with more net than design, others heavy of mesh and heavily considered as well. There are shaped tunics and garlands of net and lace, embroidered in gold or silver, that transform the simplest satin or voile de robe gowns into a superb and costly ball gown. A heavy mesh of silver net studded with beads and a heavy gold net with beads of gold beads are effective with a gown of satin made with draped skirt. These metal laces are quite transparent, and, lined with pale pink chiffon, give the effect of a much lower net waist than if the waist were of satin, and it is surprising how much more delicate are the laces, for it is not difficult to trace them in fish or herba effect.

Lace is to be had in such a wide range of prices that they can be utilized with even a comparatively inexpensive gown. In fact, it is not unusual to find a gown of lace and a gown of silver lace, and the same time the most expensive gowns can be suitably trimmed with the same material. Embroidered gold or silver lace. All kinds of cut and lined net and lace are smart this season, and heavy tulle embroidered, colored, is combined with the finest lace net in a most novel and picturesque effect. Over a pale pink gown is a simple gray tulle or voile de robe gown that will be finished by a broad band extending half way up the skirt of a gray or natural lace. Waiting again for the most effective design of the lace—there is no other way to describe it—is

Nile Green Satin Gown With Gold Embroidered Trimming

While net air contains from 2 to 5 per cent. of ozone, the percentage of ozone in sick-room air is, as a rule, very minute indeed, hence the use of air-smokers for hospitals is now finding considerable favor. The Lantier, in May last, advised of the use of the steam drinking glass, owing to the inability of the fingers to touch the rim of the ordinary tumbler, and the same model paper actually ignores the far greater risk of infection disease being spread by means of the absence of any attempt to sterilize the drinking-glasses used in public bars, restaurants, etc.

"The consumption undoubtedly is spread in this way, and the matter is one which the manufacturers of ozone apparatus might find well worthy of close attention. One of the general public have their attention drawn to this point, they will insist on the use of the ozone apparatus in public eating establishments."

AN OBSERVANT CHILD

LITTLE ADELAIDE was inclined to be cowardly. Her father found that sympathy and encouragement, and decided to have a serious talk to his little daughter on the subject of her foolish fears.

"Papa," she ventured, at the close of the lecture, "when you see a cow aren't you afraid?"

"No, certainly not, Adelaide. Why should I be?"

"Well, when you see a dog, aren't you afraid, then?"

"No, indeed not," with marked emphasis on the "no."

"And you are afraid when it thunders, papa?"

"Why, no," and he laughed at the thought, and added, "Oh, you silly child!"

"Papa," and Adelaide came closer and looked into her parent's eye, "aren't you afraid of anything in the world, but just mama?"

HOW JAPANESE BABIES ARE NAMED

IN Japan a curious custom is in vogue of naming children after the names of babies. The newborn is taken to temple when it has attained the age of two months, and to the priest who receives him the father of the little one suggests three names deemed to be appropriate. The priest writes these three names on a slip of paper for a few moments, and then throws them over his shoulder, sending them as high in the air as possible. The slip that reaches the ground last contains the name that is conferred on the waiting baby.

The next step in the process is for the priest to copy the name on a piece of silk, or even of iron, which he then presents to the proud parent with these words: "So shall the child be named."

EXPOSITION IS ASSURED

Winnipeg, Man., June 25, 1910. The most important and decisive step that has been taken in Exposition affairs in some months, occurred on the second of June, when the voters of Winnipeg qualified to vote on a money bylaw for a raising of money by law for a raising of money by law for the continental Exposition bylaw. By this vote, the property owners of the city authorized the issue of bonds for half a million dollars the proceeds to be applied to Exposition purposes. The vote was a decisive one and gave positive proof of the disposition of the people of Winnipeg toward the Exposition project, 82.1 per cent. of the vote cast being in favor of the civic grant.

Our Bylaw Defeated.
A further proof of a discriminating vote was shown in the defeat of a money bylaw granting \$400,000 to the general hospital, an institution which had the strong backing of a number of leading citizens but which evidently failed of the popular commendation given to the Exposition. Of five bylaws submitted, that by which the Exposition grant was voted, had by far the strongest place in the favor of the voters. All but the general hospital bylaw were adopted, put the percentages of the vote cast ranged from 82.1 per cent. for the Exposition bylaw to 50.07 for the hospital bylaw. All analyses of the vote show that the people of Winnipeg look upon the Exposition as something that will be a great benefit to the city and to all Canada, this being the opinion most frequently expressed during the day of voting for the bylaw.

Exposition Is Assured.
The adoption of the Winnipeg bylaw but not only the seal of approval on the 1914 Exposition, but it makes it a certainty. There has not been any substantial doubt of holding the big fair for some time, but there is no denying the fact that failure to endorse the civic grant would put a stop check on the work of the Exposition Committee and that such a defeat would have made the way of the Exposition much more difficult than it is now. With a strong endorsement in hand—accompanied by a million dollars that tells the story of Winnipeg loyalty to the Exposition—the executive will proceed to complete its campaign for funds and there seems to be no doubt whatever that the Exposition will be placed upon a sound financial and business footing within three months at the outside.

Committee For Ottawa

A Strong committee will go to Ottawa as soon as the stock subscriptions have been made up to half a million dollars. This will be a matter of a few days only, since more than \$300,000 has been subscribed already and the impetus given by the big vote for the bylaw, will bring the balance of the half million that is to be raised from sale of stock, in short order. Then the committee will take its financial sheet showing two and a half million dollars to Sir Wilfrid Laurier and

receive the Premier's answer to be arranged for the great International Exposition at Winnipeg in 1914. Only one answer is expected—that of endorsement and a Dominion grant equal in amount to the money raised from their sources. It may be that this answer will not be given forth until Sir Wilfrid makes his tour of the west, but the committee expects to know it, in part before that time. Approval by the Dominion Government, and the accompanying grant, will place the Exposition on the best possible basis and organization in a broad, comprehensive way will follow at once. Four years will be none too long to carry out the plans of the Exposition committee as they have been blocked out—with amplifications that must result from time to time—and the work will be taken up at the very earliest time that may be set.

Needless Waste

Of time and energy can be avoided by the use of our Classified Want Ads. Time and energy represent good dollars in this age. Do not see how they can be saved much for good help. Use our Want Ads and the help will come to you.

MRS. ANNE SONS TESTIMONY

After reading this straightforward statement of Mrs. Elizabeth E. Anderson of Mechanicsburg, Pa., to the Rev. Bro., get a large bottle of Parisian Sage for only fifty cents, and if it don't do for you, what it bid for Mrs. Anderson. McJoffee Bros. will give you back your money. Just read this letter, it's worth your while.

"I had given up hope of ever being cured of dandruff, when I purchased a bottle of Parisian Sage. It has entirely removed the dandruff, and has started a growth of new hair, and all this after having been troubled for 15 years. I cheerfully recommend Parisian Sage."

Parisian Sage cures dandruff, because it gets right down into the roots of the hair and kills the thousands of pernicious dandruff germs.

Since the introduction of Parisian Sage into Canada, it has been in demand by thousands of up-to-date society women. Parisian Sage will turn harsh, lustless, ill looking hair into bright, luxuriant hair in a few days. It is a delightful and invigorating dressing, contains no dye or harmful ingredients and is not sticky or greasy. The girl with the Auburn hair on every package.

AT THE BOWLING ALLIES this week.

SYNOPSIS OF CANADIAN NORTHWEST
LAND REGULATION.

Any person who is the sole head of a family, or any male over eighteen years old, may homestead a quarter section of available Dominion land in Manitoba, Alberta and Saskatchewan. The applicant must appear in person

at the Dominion land agency or sub agency for the district. Entry by proxy may be made at any agency on certain conditions by father, mother, son, daughter, brother or sister of intending homesteader.

Duties—Six months residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter section along side his homestead. Price \$300 per acre. Duties—Must reside six months in each of six years from the date of homestead entry including the time required to earn homestead patent and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may take a purchased homestead in certain districts. Price \$3 per acre. Duties—Must reside six months in each of 3 years, cultivate fifty acres and erect a house worth \$300.00.

Coal—Coal mining rights may be leased for a period of 21 years renewal at an annual rental of \$1 per acre not more than 2,560 acres shall be leased to one individual or company. A royalty at the rate of five cents per ton shall be collected on the merchantable coal mined.
